

Yaseen Khatib

Senior Full-Stack AI Engineer · Builds & Ships AI Products

Senior Full-Stack AI Engineer with 4.5+ years building and shipping autonomous AI products — Agentic RAG, LLM orchestration, and OpenAI function-calling agents on scalable MERN foundations. Open to remote roles.

WORK EXPERIENCE

Senior Software Developer

Sparity

06/2025 – Present

Hyderabad, India (Hybrid)

- **AI Framework Orchestration:** Engineering complex Agentic RAG models and sovereign system integrations inside enterprise MERN architecture.
- **Workflow Compilations:** Overseeing system transition paths to use highly optimized prompt logic and automated logic layers.

Full Stack Developer

MSA Software

01/2023 – 05/2025

Remote

- Accelerated system dashboard response speeds by **1.5x to 2x** implementing strict structural caching layers and lazy loading protocols.
- Successfully migrated sprawling legacy JavaScript codebases into safe, strictly structured **TypeScript** pipelines.
- Refactored shared context state parameters from Redux into clean **Redux Toolkit slice configurations**.

Software Developer (SDE 1)

Manorama Infosolutions Pvt Ltd.

09/2021 – 01/2023

Remote

- Engineered custom REST routing layers inside ASP.NET environments, delivering a confirmed **2x boost in wire payload processing throughput**.
- Restructured system communication parameters cleanly into rigorous Model-View-Controller patterns.

TECHNICAL SKILLS

AI ENGINEERING

Agentic RAG

OpenAI Function Calling

Local / On-Device RAG

Claude / GPT

FRONTEND MASTERY

React.js

TypeScript

Next.js App Router

React Native / Expo

Redux Toolkit

BACKEND & DATA

Node.js / Express

MongoDB

Redis Cache

SQL Server

EDUCATION

B.E (Computer Science) 2021
D. Y. Patil College of Eng.

Diploma (CS) 2018
D. Y. Patil Polytechnic

CERTIFICATIONS

- Front End Architecture — Coding Ninjas
- React Production Development — Coding Ninjas
- Advanced Backend Systems — Coding Ninjas

AI & FULL STACK PROJECTS

Sable Flagship Product

A local-first AI financial agent (React Native / Expo). Keeps 100% of financial data on-device in SQLite with no cloud backend; an OpenAI function-calling agent tracks peer-to-peer debts and pushes proactive briefings, with every database mutation gated behind a Review & Confirm boundary. Automated bank-SMS ingestion uses the Adapter Pattern and a p-queue to serialize SQLite writes.

[Local-First / On-Device AI](#)[React Native / Expo](#)[SQLite](#)[OpenAI Function Calling](#)[Local RAG](#)[Case Study ↗](#) [Code ↗](#)

streamerOS Flagship Deployment

A Rust-powered desktop cockpit for streaming professionals, engineered via modular Claude orchestrations. Handles live system telemetry feeds, multi-platform chat velocity streams, and real-time automated OBS scene synchronization.

[AI-Architected](#)[Rust / Next.js](#)[Live Telemetry](#)[WebSockets](#)[Claude AI](#)[Live Demo ↗](#) [Code ↗](#) [Website ↗](#)

Police Agentic RAG System (POSCO Matrix)

An autonomous agentic RAG engine for law-enforcement workflows. Scans massive multi-format legal archives with custom vector embeddings to trace, evaluate, and output secure, court-admissible verdict matrices.

[Agentic AI](#)[Vector Retrieval](#)[LLM Orchestration](#)[Python](#)

IntegrateX Automation Core

A node-routing workflow-automation environment with responsive connectors, processing layers, and directional edge bindings. A custom state Serialization Adapter compresses graph definitions over the wire.

[94% Payload Compression](#)[React Flow](#)[Zustand](#)[TypeScript](#)

Automated LinkedIn Pipeline

A Python autonomous agent on GitHub Actions that drafts and publishes technical LinkedIn content on a cron via the Gemini API — zero servers, zero manual posting.

[Autonomous Agent](#)[Python](#)[GitHub Actions](#)[Gemini API](#)[Cron](#)[Code ↗](#)

Zero-Cost AI Blog Writer

A native Next.js pipeline that autonomously writes, formats, and deploys Markdown articles to this site — Gemini drafts the MDX, GitHub Actions commits it, and GitHub Pages ships it at \$0 runtime cost.

[Autonomous Pipeline](#)[Next.js](#)[MDX](#)[google-genai](#)[GitHub Actions](#)[Case Study ↗](#) [Code ↗](#)
